Why is Dementia Awareness important?

As dementia cases rise throughout the UK, this Dementia Awareness Course aims to provide a greater awareness of the neurodegenerative syndrome. Over 850,000 people currently live with dementia in the UK, and the NHS predicts that this number will increase to 1 million by 2025. The topics covered in this online training will allow learners to identify what dementia is and recognise the signs and symptoms of the condition.

NHS - National Health Service

Who is Dementia Awareness training for?

Our Dementia Awareness Course is for anyone who works in the health and social care sector and works with service users who require care of some sort.

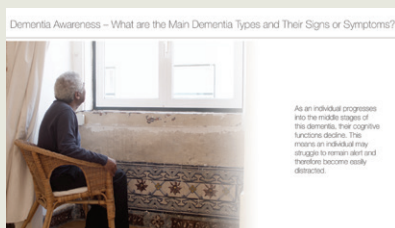

What does the Dementia Awareness Course cover?

The Dementia Awareness Course answers the following questions:

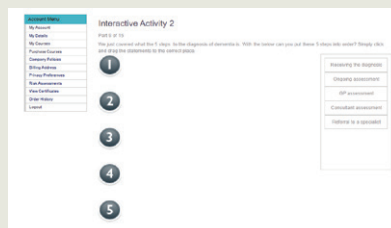

- *What is Dementia?*
- *What are the causes of dementia?*
- *What are the main dementia types and their signs or symptoms?*
- *What are the main dementia types and their signs or symptoms?*

What is the benefit of Dementia Awareness training to your business?

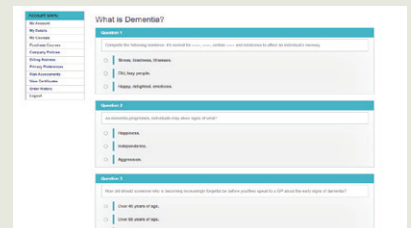

Our Dementia Awareness Course is for anyone who works in the health and social care sector with service users who require care of some sort. This course will offer your staff quick and effective Dementia Awareness training to help them become aware of the importance of Dementia for any person. The training is suitable for private and public sector companies, including community homes (care homes) and other organisations in the healthcare sector.
